**ELCOME APPOINTED REGIONAL SALES AND SERVICE
REPRESENTATIVE FOR SAL NAVIGATION AB**

Agreement Includes VDR and SVDR Shipboard Annual Performance Tests

DUBAI, UNITED ARAB EMIRATES – June 20, 2022 – Elcome International today announced it has signed an agreement to become an authorized sales and service representative for Sweden based SAL Navigation AB.

Under the agreement, Elcome is authorized to carry out sales, installation, service, and maintenance for SAL's echo sounders, speed logs, voyage data recorders (VDR) and Cloud applications and services on merchant ships calling in United Arab Emirates, Sri Lanka, Singapore, Saudi Arabia, Qatar, Oman, Kuwait, India, Egypt, and Bahrain. In addition, SAL has authorized Elcome to conduct mandatory annual performance tests (APTs) for its SVS-200 and SVF-200 VDRs on a worldwide basis.

SAL Navigation traces its origins back to 1912, when the Stockholm-based company introduced its first mechanical speed logs. Toward the end of the century, SAL was acquired by Consilium AB and became part of the Consilium Navigation Group. Soon thereafter, Consilium launched its first VDR, followed by a succession of newer models of VDRs and S-VDRs to meet international carriage requirements. More recently, the company launched a remote playback functionality with remote diagnostics, incorporated with web-based applications in a service platform called Consilium Cloud. In 2018, all Consilium navigation product were organized into a subsidiary under the SAL Navigation brand, which still is part of the Consilium Group.

Mikael Eriksson, operations manager of SAL Navigation, said, "Elcome International is a well known provider of ship services and systems to the international shipping industry with a worldwide reputation for excellence and quality. We believe these representation agreements will ensure prompt and responsive shipboard service meeting the highest industry quality standards for our customers throughout the region."

"SAL Navigation's VDRs, speed logs, echosounders and Cloud systems are a perfect fit and an important addition to the maritime product lines we represent," said Jimmy Grewal, executive director of Elcome International. "The company has an unsurpassed reputation for its high-quality shipboard systems, and we look forward to a close and productive sales and service partnership with the SAL Navigation team."

About Elcome International LLC

Elcome was founded in 1970 and is one of the world's largest maritime companies with a diversified portfolio of technologies, solutions, and services. The company is headquartered in Dubai and maintains 24 offices in 11 countries extending from Europe to Southeast Asia, with a total of more than 500 employees. Elcome is the authorized sales and service representative for world-leading OEMs across defense, energy, marine and yachting industry segments and is also a leading system integrator responsible for many vital land-based, offshore, and national security projects in the Middle East and Southeast Asia. Elcome also operates an FTA-approved training center and bridge simulator in Dubai offering training and certification for operators and bridge officers and is the Middle East's largest supplier of nautical charts and publications, both print and digital, with two print-on-demand centers in Dubai and Colombo for ADMIRALTY Standard Nautical Charts.
